## Information Providers Need to Know! Certification Extensions - **UPDATED 4/16/20**

### **NRP Neonatal Resuscitation Program**

For those individuals whose NRP expiration date falls in March, April, May, June, or July of 2020, the AAP recommends that employers and regulatory bodies consider extending recognition of an NRP card beyond its recommended renewal date, for up to 120 days.

### **NREMT National Registry of Emergency Medical Technicians**

The NREMT has extended the March 31, 2020 expiration date on current certifications to June 30, 2020 and has waived limits on distributive education. The department accepts current and valid NREMT certification regardless of status (active, inactive, provisional) for state certification purposes.

### **AHA American Heart Association BLS, ACLS, PALS**

Per the statement regarding further extensions of AHA course completion cards beyond 60 days past the recommended renewal day (in interim guidance released on March 13, 2020), and given the ongoing threat of exposure to COVID-19, with many communities under shelter in place orders to minimize the spread of the disease, the AHA is extending AHA Instructor and Provider Course Completion Cards for 120 days beyond their recommended renewal date, beginning with cards that expire in March 2020.

### **ENA Emergency Nurses Association - TNCC, ENPC**

ENA is announcing it will extend the ENPC and TNCC verification to Aug 31, 2020, for providers whose status was set to expire between May 31 - July 31 of this year. This extension will also include those providers previously set to expire in March and April who were previously extended to May 31.
