

Med Evac Response to COVID-19

In compliance with recommendations from the CDC, WHO and Colorado Government to minimize the risk of COVID-19, Med Evac will be taking the following precautions as it relates to our community and partners. All community events with the general public will be cancelled and re-evaluated monthly. All healthcare professional safety trainings and education will occur as planned unless our customers decide to cancel. Med Evac will provide health survey questions to be answered by those that attend trainings for everyone's safety, per Banner Health. Any education offering with greater than 10 people will be postponed and rescheduled for a later date. We understand the need to maintain our safety and the needs to maintain certifications that may be expiring. We will do as many of these trainings remotely when feasible. As of now, NREMT, AHA and other credentialing bodies have provided grace periods for recertification and allowed more distributive education options. We will keep our site updated and advocate to the State of Colorado for similar adjustments to their recertification process for both EMS and Nursing. This is a very dynamic situation and we will do our best to assist in your needs.
